Features our exclusive Crystal-Right™ media that can perform multiple treatments in a single unit. Ideal for well water applications.

Utilizing an advanced split-tank design, RC units contain softening resin and filtering carbon into one unit. Ideal for city water applications.

High capacity resin paired with patented technology create an efficient softener you can trust. CareSoft Elite models include self-chlorination.

Basic softener that uses the same high grade standards as our more advanced models at more economical price.

Air-charged chamber oxidizes sulfur gas for easy filtering.

Air-charged chamber oxidizes dissolved iron for easy filtering.

Air unit built with GreenSand Plus media for easy iron reduction.

Blended medias to reduce iron content and neutralize acidic water.

Filter available with Turbidex, carbon, or other medias. Acid neutralizer that corrects low pH and add hardness.

Cartridge filter system with many options for custom solutions.

\*Total of iron and manganese combined when applying CR-100 or CR-200.

All specifications will vary based on quality of influent water. Larger tanks sizes available for higher capacities.
